

Are you ready for a game changing team build session? You've found it! This workshop takes your team through an eye-opening, heart-opening and "aha moment creating" journey. Metaprograms are mental filters that every human has. These filters govern the way we think, the way we process information, the way we work, our preferences, our attitudes, what we see, what we attend to, and what we dismiss. Never before has there been a more comprehensive way for your team members to get to know one another, truly understand their similarities and differences, and come away with a plan to build cohesion, team relationships that really work, productivity, effectiveness and engagement. If you are ready to take your team to dizzying heights of performance, then this workshop is for you.

This program contains content that is absolutely game changing for team building. We will explore 48 different "Metaprograms" – the internal filters that govern our thoughts, motivations, preferences, attitudes and energy levels towards the work we do. The program content is highly interactive and uses activities to explore these metaprograms in action.

- Teams who want a new way to look at team building and ways of getting to know each other.
 - Teams who want their members to truly understand and appreciate individual preferences and working styles.
 - Team leaders and team member who want to know EXACTLY how to get the very best engagement, connection and productivity out of their people.
-
- Define Metaprograms and discuss how they work. We will also clearly define what this is NOT – and how it is different from other types of profiling mechanisms.
 - Discuss and describe each of the 48 metaprograms
 - Explore each metaprogram with discussions and activities
 - Create a plan for implementing the learnings and growing the team for positive results
